VPN Connection & Disconnection Guide (macOS + YubiKey)

To Connect to the VPN

1. Insert your YubiKey into the USB port.

2. Open Terminal.

3. Navigate to the folder with the VPN script (if not in path):

   cd ~/Downloads/CCG\ VPN\ Mac

4. Make sure the script is executable (only once):

   chmod +x ccg-up-macos.sh

5. Run the connection script:

   ./ccg-up-macos.sh

   You'll be prompted to enter your YubiKey PIN.

To Disconnect from the VPN

1. Open Terminal.

2. Navigate to the folder with the script (if needed):

   cd ~/Downloads/CCG\ VPN\ Mac

3. Make sure the script is executable (only once):

   chmod +x ccg-down-macos.sh

4. Run the disconnect script:

   ./ccg-down-macos.sh

Optional: Make Scripts Globally Accessible

Optional: Move Scripts to Global Path for easier access:

   sudo mv ccg-up-macos.sh /opt/homebrew/bin/

   sudo mv ccg-down-macos.sh /opt/homebrew/bin/

   sudo chmod +x /opt/homebrew/bin/ccg-*.sh

Then use:

   ccg-up-macos.sh   # to connect

   ccg-down-macos.sh   # to disconnect
